Market Overview

Median closing prices follow a seasonal trend, generally reaching their lowest in the winter and their highest in the spring.

This seasonality is also reflected in the monthly average days on market, with the longest average occurring during the winter, and the lowest average occurring during the spring; however, average days on market increased in 2025 and again in 2026, possibly signaling weaker demand for homes in Santa Clara. This pattern may help explain the subtle downtrend in both annual peak and trough closing prices.

Pricing Trends

Closing prices relative to the listing price have been on a downward trajectory since their peak in April 2024, and in July 2025, listings started to close at the same resulting price as the original listing price. These trends continued into 2026, but homes, relative to their original listing price, are not being sold as high as in 2024 and 2025.

In contrast, the median mortgage rate has not seen much seasonal consistency. In theory, mortgage rate and closing price should be negatively correlated, but that is not the case with Santa Clara's historical data.

Market Activity

After peaking in May 2024, closed sales reached their lowest in January 2026. Since then, the market has slowly recovered, doubling its closed sales with a current yearly peak of 528 in June 2026. Yet, the number of new listings per month has remained relatively similar, peaking every May since 2024.

The widening gap between new listings and closed sales suggests that buyers have a wider selection of properties, while sellers face greater competition.

Competitive Landscape

Andy Tse is the clear leader among individual agents, ranking first by a wide margin in both properties sold and sales volume. David Lillo, Xiaozhu Kang, and Sophie Shen rank second through fourth in both measures, each selling more than 80 additional properties than the fifth-ranked agent.

Listing Agents

Agent	Sold Count	Sales Volume (\$)
Andy Tse	173	390,988,376
David Lillo	152	298,583,259
Xiaozhu Kang	142	226,485,384
Sophie Shen	133	174,835,385
Bernadina Romero	52	—
Suzie Gibbons	48	—
Bonafede Team	—	137,150,985
Kevin Swartz	—	132,743,011

Among offices, Compass, Coldwell Banker Realty, and Intero Real Estate Services hold the top three in both properties sold and sales volume. The concentration at the top among both agents and offices suggests that listing access, brand reach, productivity, and longevity remain important competitive advantages.

Listing Offices

Office	Sold Count	Sales Volume (\$)
Compass	2,630	4,388,276,833
Coldwell Banker Realty	2,410	3,967,504,475
Intero Real Estate Services	2,402	3,958,746,763
Christie's International R...	958	1,631,236,998
Kw Bay Area Estates	518	871,668,561
Exp Realty Of California Inc	267	—
Keller Williams Realty-Sili...	—	643,552,618

Key Takeaways

- Prices and days on market remain seasonal, with lower closing prices and longer selling times year over year.
- Since July 2025, buyers have purchased homes at approximately original listing prices.
- Softer demand and similar incoming listing levels suggest a wider selection for buyers.
- Andy Tse, David Lillo, Xiaozhu Kang, and Sophie Shen dominate agent sales counts and volume.
